Geographic structure and secondary contact in Dryas

Sample−level K19 ancestry; pale blue indicates the supplied LGM boundary layer

Geographic regions

- Refugial region
- Admixture region

Diversity signature

- Isolated relict
- Persistent refugium
- Founder population
- Secondary contact

K19 ancestry component

- integrifolia − North Slope/Inuvik
- ajanensis − interior Alaska
- hookeriana − Rocky Mountains
- integrifolia − SW Greenland/E Canada
- alaskensis − interior Alaska/Yukon
- ajanensis − Seward/Chukotka
- subincisa − Svalbard
- integrifolia − N Greenland
- grandis/crenulata/punctata − Yakutia
- octopetala − N Atlantic/Scandinavia
- octopetala − Pyrenees/Alps
- octopetala − S Carpathians/Balkans
- octopetala − W Carpathians
- oxyodonta − Altai/Sayan
- Pobeda − E Yakutia
- drummondii − NW North America
- octopetala − Iceland
- caucasica − Caucasus
- subincisa − Komi/Urals

Gray pie outlines indicate samples outside the focal population comparison.
